Hydroxychloroquine:
Lupus has been in the news lately due to the shortage of hydroxychloroquine (HCQ), a necessary medication for many people with lupus. By participating in the Walk to End Lupus Now, I’m supporting the Lupus Foundation of America, Philadelphia Tri-State Chapter, which has directly responded to this shortage. They reached out to federal and state governments, state boards of pharmacy, drug manufacturers, pharmacy chains, the CDC, the FDA, and many more to ensure that people with lupus have access to HCQ. Additionally, they have helped many in our region locate HCQ at local and mail order pharmacies.

I know that COVID-19 has affected everyone in our country in some way, but now more than ever, the LFA needs our help to advocate on behalf of the lupus community. Please join my team, <TEAM NAME>, at the <WALK> by making a gift to directly impact the tri-state lupus community. This gift provides research funding, educational programs, support networks, and advocacy initiatives. Any amount will make a difference in the lives of the lupus community.

General:
May 5th is #GivingTuesdayNow. Living with lupus is more challenging now than ever with the hydroxychloroquine shortage and risk of COVID-10. Lupus research has never been so important - we need to find a cure and identify additional treatments. Please make a gift to the Lupus Foundation of America, Philadelphia Tri-State Chapter today who are doing incredible work to help people with lupus.

Please join my team, <TEAM NAME>, at the <WALK> by making a gift to directly impact the tri-state lupus community.
